Bulletin 71.1:67D

Introduction

The 67D Series regulators are typically used to deliver constant reduced pressure of gaseous fluids to pilot-operated controllers and other pneumatic instrumentation. As shown in the Available Configurations table, an assortment of regulators is available to meet diverse flow requirements.

Features

- **Compact**—The 67D Series regulators are engineered for outstanding performance in a compact, lightweight package.
- **Pilot Supply Regulator**—Improves the accuracy of two-path control regulators by reducing inlet sensitivity caused by fluctuating inlet pressures.
- **Pressure Loading Regulator**—Provides accuracy and improved performance in dirty steam service by eliminating the need for a pilot regulator.
- **Sour Gas Service Capability**—NACE International MR0175 and MR0103 compliant construction available.
- **Optional Stainless Steel Construction**—The Types 67DS, 67DSR, 67DFS, and 67DFSR provide high resistance to corrosion, which is especially beneficial for offshore applications.
- **Full Usable Capacity**—Fisher® regulators are laboratory tested. 100% of the published capacities can be used with confidence.
- **Internal Relief**—The Types 67DR, 67DSR, 67DFR, and 67DFSR have an internal relief valve with a soft seat for reliable shutoff with no discernible leakage. These regulators are recommended for conserving plant air.
- **Smart Bleed™**—Opens to exhaust downstream pressure when inlet pressure drops below outlet pressure. Recommended for dead-end service.
- **Integral Filter**—The Types 67DF, 67DFR, 67DFS, and 67DFSR have an integral filter ensuring clean downstream air supply.
- **Ease of Maintenance**—No special tools are required to perform maintenance, and all maintenance can be performed with the regulator in the line. Filter elements are easily replaced.
- **Rugged Construction**—The 67D Series regulators are engineered for longer service life with minimal maintenance requirements.
- **Dual Second Outlets**—Body side outlets for pressure gauge or other uses.
- **Corrosion Resistant Fasteners**—Bolting and adjusting screw are double zinc-chromated for enhanced corrosion resistance. Optional stainless steel bolting and adjusting screw are also available.

Specifications

Available Configurations

- Type 67D:** Direct-operated regulator with aluminum body and without internal relief
 - Type 67DR:** Aluminum body with internal relief
 - Type 67DS:** Stainless steel body without internal relief
 - Type 67DSR:** Stainless steel body with internal relief
 - Type 67DF:** Aluminum body with filter and without internal relief
 - Type 67DFR:** Aluminum body with filter and internal relief
 - Type 67DFS:** Stainless steel body with filter and without internal relief
 - Type 67DFSR:** Stainless steel body with filter and internal relief
- See also Table 1

Body Size, Inlet and Outlet Connection Style
1/2 NPT

Construction Materials
See Table 3

Maximum Inlet Pressure (Body Rating)⁽¹⁾
All filtered models: 250 psig / 17.2 bar
All unfiltered models: 400 psig / 27.6 bar

Outlet Pressure Ranges
See Table 2

Maximum Emergency Outlet Pressure⁽¹⁾
150 psi / 10.3 bar over outlet pressure setting up to a maximum of 250 psi / 17.2 bar

Flow Capacities
See Table 4 and Capacity Information section

Wide-Open Flow Coefficients
Main Valve: $C_g: 45.24; C_v: 1.33; C_1: 35.02;$
Internal Relief Valve: $C_g: 1.45; C_v: 0.045; C_1: 32.8$

IEC Sizing Coefficients
 $X_t: 0.75$

Types 67DR, 67DSR, 67DFR, and 67DFSR Internal Relief Performance
Low capacity for minor seat leakage only, other overpressure protection must be provided if inlet pressure can exceed the maximum pressure rating of downstream equipment or exceeds maximum outlet pressure rating of the regulator.

Approximate Weights
Types 67D and 67DR: 1.2 pound / 0.5 kg
Types 67DF and 67DFR: 2.0 pounds / 0.9 kg
Types 67DS and 67DSR: 2.8 pounds / 1.2 kg
Types 67DFS and 67DFSR: 4.6 pounds / 2.1 kg

Smart Bleed™ Check Valve Setpoint
6 psi / 0.41 bar differential

Pressure Registration
Internal

Spring Case Vent Location
Aligned with inlet standard, other positions optional

Drain Valve Location
Aligned in the center of the dripwell

Temperature Capabilities⁽¹⁾
With Nitrile (NBR)
Standard Bolting: -20 to 180°F / -29 to 82°C
Stainless Steel Bolting: -40 to 180°F / -40 to 82°C

With Fluorocarbon (FKM):
Polyethylene Filter⁽⁴⁾ (Standard):

0 to 180°F / -18 to 82°C
Polyvinylidene (PVDF), Stainless Steel, or Glass Filter (Optional):
 0 to 300°F / -18 to 149°C

With Silicone (VMQ)⁽²⁾ diaphragm, Low Temperature Nitrile (NBR) O-rings, and Low Temperature bolting: -60 to 180°F / -51 to 82°C

With Gauges: -40 to 180°F / -40 to 82°C
With Automatic drain: 40 to 175°F / 4 to 79°C

Types 67DF, 67DFR, 67DFS, and 67DFSR Filter Capabilities

Micron Rating:
Polyethylene Filter⁽⁴⁾ (Standard): 5 microns
Glass Fiber Filter (Optional): 5 microns
PVDF Filter (Optional): 40 microns
Stainless Steel Filter (Optional): 40 microns

Options

- All Types**
- Handwheel adjusting screw
 - NACE International MR0175 or MR0103⁽³⁾ construction
 - Panel mount (includes spring case with 1/4 NPT vent, handwheel, and panel mounting nut)
 - Closing cap (available on spring case with 1/4 NPT vent)
 - Fluorocarbon (FKM) elastomers for high temperatures and/or corrosive chemicals
 - Silicone (VMQ) elastomers for cold temperatures
 - Fixed Bleed Restriction
 - Triple scale outlet pressure gauge (brass or stainless steel)
 - Stainless steel stem and valve plug
 - Pipe plug in second outlet
- Types 67DFR and 67DFSR only**
- Smart Bleed internal check valve
- Types 67DF, 67DFR, 67DFS, and 67DFSR**
- Stainless steel drain valve

1. The pressure/temperature limits in this Bulletin and any applicable standard or code limitation should not be exceeded.
 2. Silicone (VMQ) is not compatible with hydrocarbon gas.
 3. Product complies with the material requirements of NACE International MR0175 or MR0103. Environmental limits may apply.
 4. Do not use in high aromatic hydrocarbon service.

1. Silicone (VMQ) diaphragm is only available with internal relief (Types 67DR, 67DSR, 67DFR, and 67DFSR).

Inconel® is a mark owned by Special Metals Corporation.

Figure 2. 67D Series Operational Schematics

Principle of Operation (Figure 2)

Downstream pressure is registered internally on the lower side of the diaphragm. When the downstream pressure is at or above the set pressure, the valve plug is held against the orifice and there is no flow through the regulator. When demand increases, downstream pressure drops slightly allowing the spring to extend, moving the stem down and the valve plug away from the orifice. This allows flow through the regulator.

Internal Relief (Types 67DR, 67DSR, 67DFR, and 67DFSR)

If for some reason, outside of normal operating conditions, the downstream pressure exceeds the setpoint of the regulator, the force created by the downstream pressure will lift the diaphragm until the diaphragm is lifted off the relief seat. This allows flow through the token relief. The relief valve on the Type 67DR, 67DSR, 67DFR, or 67DFSR is an elastomer plug that prevents leakage of air from the downstream to atmosphere during normal operation, thereby conserving plant air.

Smart Bleed™ Airset

In some cases, it is desired to exhaust downstream pressure if inlet pressure is lost or drops below the setpoint of the regulator. For example, if the regulator is installed on equipment that at times has no flow demand but is expected to backflow on loss of inlet pressure. The Type 67DFR or 67DFSR can be ordered with the Smart Bleed option which includes an internal check valve for this application. During

operation, if inlet pressure is lost, or decreases below the setpoint of the regulator, the downstream pressure will back flow upstream through the regulator and check valve. This option eliminates the need for a fixed bleed downstream of the regulator, thereby conserving plant air.

Note

During normal operation the check valve's metal to metal seat allows limited flow through the regulator from the inlet to outlet, even when there is no downstream demand. To prevent downstream pressure buildup, the Smart Bleed option is only available with the internal relief version of the 67 Series.

Installation

The 67D Series regulators may be installed in any position. Spring case vents must be protected against the entrance of rain, snow, debris, or any other foreign material that might plug the vent openings. The inlet connection is marked "In" and the main outlet connection is marked "Out". If a pressure gauge is not installed in one of the two secondary outlet connections, plug the unused connections. See Figures 4 and 5 for dimensions.

Emerson Process Management Regulator Technologies, Inc. provides an instruction manual with every regulator shipped. Refer to this for complete installation, operation and maintenance instructions. Included is a complete listing of individual parts and recommended spare parts.

Overpressure Protection

The 67D Series regulators have maximum outlet pressure ratings that are lower than their maximum inlet pressure ratings. A pressure-relieving or pressure-limiting device is needed if inlet pressure can exceed the maximum outlet pressure rating.

Types 67DR, 67DSR, 67DFR, and 67DFSR regulators have a low capacity internal relief valve for minor seat leakage only. Other overpressure protection must be provided if the maximum inlet pressure can exceed the maximum pressure rating of the downstream equipment or exceeds maximum outlet pressure rating of the Type 67DR, 67DSR, 67DFR, or 67DFSR regulator.

Overpressuring any portion of a regulator or associated equipment may cause leakage, parts damage, or personal injury due to bursting of pressure-containing parts or explosion of accumulated gas. Regulator operation within ratings does not preclude the possibility of damage from external sources or from debris in the pipeline. A regulator should be inspected for damage periodically and after any overpressure condition.

Refer to the Capacity Information section and the Wide-Open Flow Coefficients for Relief Valve Sizing in the Specifications section on page 3 to determine the required relief valve capacity.

Capacity Information

Table 4 shows the air regulating capacities of the 67D Series regulators at selected inlet pressures and outlet pressure settings. Flows are shown in SCFH (at 60°F and 14.7 psia) and in Nm³/h (at 0°C and 1.01325 bar) of air.

Figure 3. 67D Series Vent Positions

Note

The 67D Series regulators may be sized for 100% flow using capacities as shown in Table 4. It is not necessary to reduce published capacities.

To determine the equivalent capacities for other gases, multiply the table capacity by the following appropriate conversion factor: 1.29 for 0.6 specific gravity natural gas, 0.810 for propane, 0.707 for butane, or 1.018 for nitrogen. For gases of other specific gravities, divide the table capacities by the square root of the appropriate specific gravity. To find wide-open flow capacities for relief sizing at any inlet pressure, perform one of the following procedures. Then, if necessary, convert using the factors provided above.

For critical pressure drops (absolute outlet pressure equal to or less than one-half of absolute inlet pressure), use the following formula:

$$Q = (P_1)(C_g)$$

For pressure drops lower than critical (absolute outlet pressure greater than one-half of absolute inlet pressure), use the following formula:

$$Q = \sqrt{\frac{520}{GT}} C_g P_1 \text{SIN} \left(\frac{3417}{C_1} \sqrt{\frac{\Delta P}{P_1}} \right) \text{DEG}$$

where,

- Q = gas flow rate, SCFH
- P₁ = absolute inlet pressure, psia (P₁ gauge + 14.7)
- C_g = gas sizing coefficient
- G = specific gravity of the gas
- T = absolute temperature of gas at inlet, °Rankine
- C₁ = flow coefficient (C_g ÷ C_v)
- ΔP = pressure drop across the regulator, psi

Then, if capacity is desired in normal cubic meters per hour (at 0°C and 1.01325 bar), multiply SCFH by 0.0268.

NACE Universal Compliance

Optional materials are available for applications handling sour gases. These constructions comply with the recommendations of NACE International sour service standards.

The manufacturing processes and materials used by Regulator Technologies assure that all products specified for sour gas service comply with the chemical, physical, and metallurgical requirements of NACE MR0175 and/or NACE MR0103. Customers have the responsibility to specify correct materials. Environmental limitations may apply and shall be determined by the user.

1. Inlet pressures above 250 psig / 17.2 bar with a maximum of 400 psig / 27.6 bar are only available on unfiltered models (Types 67D, 67DR, 67DS, and 67DSR).
 2. Available for Types 67DS, 67DSR, 67DFS, and 67DFSR only.

Ordering Information

When ordering, complete the Ordering Guide on pages 11 and 12. Refer to the Specifications section on page 3. Review the description to the right of each specification and the information in each referenced table or figure. Specify your choice whenever a selection is offered.

Ordering Guide

Type (Select One)

- 67D (aluminum without internal relief)***
- 67DR (aluminum with internal relief)***
- 67DS (stainless steel without internal relief)***
- 67DSR (stainless steel with internal relief)***
- 67DF (aluminum with filter and without internal relief)***
- 67DFR (aluminum with filter and internal relief)***
- 67DFS (stainless steel with filter and without internal relief)***
- 67DFSR (stainless steel with filter and internal relief)***

Quantity (Specify) _____

Spring Case Style (Select One)

- Drilled hole vent (Types 67D, 67DR, 67DF, and 67DFR **standard**)***
- 1/4 NPT vent (Types 67DS, 67DSR, 67DFS, and 67DFSR **standard**)***
- Single hole panel mount***

Adjusting Screw (Select One)

- Square head (Types 67D, 67DR, 67DF, 67DFR **standard**)***
- Square head with closing cap (Types 67DS, 67DSR, 67DFS, and 67DFSR **standard**)***
- Handwheel***

Outlet Pressure Range (Select One)

- 0 to 20 psig / 0 to 1.4 bar***
- 0 to 35 psig / 0 to 2.4 bar***
- 0 to 60 psig / 0 to 4.1 bar***
- 0 to 125 psig / 0 to 8.6 bar***
- 0 to 150 psig / 0 to 10.3 bar (Types 67DS, 67DSR, 67DFS, and 67DFSR only)***

Diaphragm, O-Rings, and Valve Seat Plug (Select One)

- Nitrile (NBR) (**standard**)***
- Fluorocarbon (FKM)**
- Silicone (VMQ) diaphragm, Low Temperature Nitrile (NBR) O-rings, and Nitrile (NBR) valve seat*

Filter Material (Select One)

- Polyethylene (5 microns) (**standard**)***
- Glass (5 microns)***
- Polyvinylidene (PVDF) (40 microns)***
- Stainless steel (40 microns)***

Drain Valve (Select One)

- Brass (Types 67DF and 67DFR **standard**)***
- Stainless steel (Types 67DFS and 67DFSR **standard**)***
- Automatic Drain with Nitrile (NBR) elastomers***
- Automatic Drain with Fluorocarbon (FKM) elastomers**

Spring Case Vent Location (Select One)

- Position 1 - Aligned with inlet (**standard**)***
- Position 2
- Position 3
- Position 4

External Fixed Bleed for Type 67DR, 67DSR, 67DFR, or 67DFSR (Optional)

- Yes**

Smart Bleed™ Internal Check Valve Airset

(Optional - Types 67DFR and 67DFSR only)

- Yes**

Second Outlet (Select One)

- Open (Types 67D, 67DR, 67DF, and 67DFR **standard**)***
- Plugged with pipe plug (Types 67DS, 67DSR, 67DFS, and 67DFSR **standard**)***
- Pressure Gauge (see below)

Triple Scale Pressure Gauge (Optional)

- Brass Gauge** or **Stainless Steel Gauge**
 - 0 to 30 psig / 0 to 0.2 MPa / 0 to 2.1 bar***
 - 0 to 60 psig / 0 to 0.4 MPa / 0 to 4.1 bar***
 - 0 to 160 psig / 0 to 1.1 MPa / 0 to 11.0 bar***

- continued -

Bulletin 71.1:67D

Ordering Guide (continued)

NACE International MR0175 Construction (Optional)⁽¹⁾

- Yes (not available with gauge)**

NACE International MR0103 Construction (Optional)

- Yes (not available with gauge)**

Replacement Parts Kit (Optional)

- Yes, send one replacement parts kit to match this order.

1. Product complies with the material requirements of NACE International MR0175. Environmental limits may apply.

Regulators Quick Order Guide	
***	Readily Available for Shipment
**	Allow Additional Time for Shipment
*	Special Order, Constructed from Non-Stocked Parts. Consult Your local Sales Office for Availability.
Availability of the product being ordered is determined by the component with the longest shipping time for the requested construction.	

Specification Worksheet

Application (Please designate units):
 Specific Use _____
 Line Size _____
 Gas Type and Specific Gravity _____
 Gas Temperature _____
 Does the Application Require Overpressure Protection?
 Yes No If yes, which is preferred:
 Relief Valve Monitor Regulator
 Shut-off Device
 Is overpressure protection equipment selection assistance desired? _____

Pressure (Please designate units):
 Maximum Inlet Pressure (P_{1max}) _____
 Minimum Inlet Pressure (P_{1min}) _____
 Downstream Pressure Setting(s) (P_2) _____
 Maximum Flow (Q_{max}) _____

Performance Required: _____
 Accuracy Requirements? _____
 Need for Extremely Fast Response? _____

Other Requirements: _____
